

Are you an Indigenous student pursuing studies in the natural sciences or engineering?

Are you interested in sharing your experiences by traveling to communities and schools to promote these exciting fields to Indigenous youth?

The NSERC Indigenous Student Ambassadors (NISA) can help you make a solid contribution to promoting science and engineering among Indigenous youth in Canada. The supplement covers up to \$5,000 for costs associated with the proposed science and engineering promotion activity, and Indigenous community or school visit.

This grant aims to engage Indigenous students and fellows in promoting interest and participation in the natural sciences and engineering (NSE) by visiting Indigenous communities and schools in Canada. The grant is available to Indigenous persons in Canada who are registered in a Canadian university, polytechnic, college or Cégep in the NSE or have been registered last term and plan to return next term to one of those institutions for studies in the NSE or be a postdoctoral fellow in the NSE at a Canadian university.

There are no fixed deadlines for this grant. Applications must be submitted between two and six months before the start of a proposed outreach activity. The grants available in a given year will be awarded on a first-come, first-served basis.
