Ruby Muzzatti
62 YORK STREET
SACKVILLE NB E4L 1C6

Ruby Muzzatti:

The Natural Sciences and Engineering Research Council of Canada (NSERC) is pleased to offer you an Undergraduate Student Research Award (USRA). The program aims to nurture your interest and fully develop your potential for a research career in the natural sciences and engineering and to encourage you to undertake graduate studies by providing research work experience that complements your studies in an academic setting.

NSERC offers a USRA to candidates on the basis of their academic excellence, research potential and expected quality of the training and mentorship to be received.

This federal support for research is an investment by the people of Canada. By demonstrating the social, economic and cultural value of their natural sciences and engineering research, NSERC award recipients help strengthen public understanding of and support for NSERC-funded research.

Review the Terms and conditions of award located in your USRA results folder carefully, as they contain important information about your award. Retain this letter for future reference.

Congratulations on your achievement.
